

1. Install required libraries

In the terminal (in the folder with requirements.txt) run:

```
pip install -r requirements.txt
```

2. Run the program

In the same terminal, type:

```
python3 trajectories_plot.py
```

3. Provide the folder path

The program will ask:

Enter the path to the folder with LAZ or CSV files (Enter = current directory):

- Press **Enter** to use the current folder.
- Or type the path to a different folder containing your files, then press Enter.

The program will read .csv and .laz files, plot trajectories, and save the plot as trajectories_plot.png in the same folder.

Example of Use
